Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Wednesday 29 Sep 2021

UK Outlook for Thursday 14 Oct 2021 to Thursday 28 Oct 2021:
Confidence in this period is low. However, the most likely outcome is for a north-south split, with low pressure and the wettest weather in the north and higher pressure and driest conditions in the south or southwest. Later in this period, there is the chance for settled conditions to become more widely prevalent across the UK. Temperatures are likely to be around or slightly above average.
